Re: Pierce Park Neighborhood Association; Neighborhood Connectivity Pathway

To: Pierce Park Neighborhood Association

Boise Valley Irrigation Ditch Co. would like to express its general support for the Pierce Park Neighborhood Connectivity Pathway grant proposal. We recognize that increased access between neighborhoods would be of great benefit to this part of our city. We wish the Pierce Park Neighborhood Association the best of luck and hope that the City will decide to fund this project. The irrigation company understands this letter of support allows the pathway project to move toward design. The company will be engaged during the design process to assure all requirements are met. Memorandums of Understanding will be required if the project moves forward. Boise Valley Irrigation will not be responsible for maintenance and the design must provide access for all required work on the irrigation canal. We are willing to work with the Pierce Park Neighborhood Association and City of Boise to explore the proposed plans and construction of the pathway.

Sincerely,

John Patton
Boise Valley Irrigation Ditch Co.
