Re: Pierce Park Neighborhood Association; Neighborhood Connectivity Pathway

To: Pierce Park Neighborhood Association

As the representative for the Millwell Subdivision HOA, I would like to express my general support for the Pierce Park Neighborhood Connectivity Pathway project proposal. The HOA does have concerns with the ability of persons to travel from another neighborhood into the Millwell Subdivision without lighting (security) or fencing along any open canal. Two items are children playing in an unsupervised location, the other being the quick get away undesirable persons (potential criminal acts) would have entering and exiting our subdivision.

The Millwell Subdivision understands this letter of support allows the pathway project to move toward design. The HOA will be engaged as appropriate during the design process to assure decisions are in line with what is best for the subdivision. The Millwell Subdivision will not be responsible for maintenance or installation costs. We are willing to work with the Pierce Park Neighborhood Association and City of Boise to explore the proposed plans and construction of the pathway. We wish the Pierce Park Neighborhood Association the best of luck and hope that the City will decide to fund this project.

Thank you,

Todd Blackwell
Millwell Subdivision developer and HOA representative
